At Morrissey Rehabilitation & Treatment Counselling (MRTC)

Our counselling and therapy services encourage individuals to transform difficult experiences into opportunities for personal growth and renewal.

MRTC successfully applies counselling skills to a variety of work related and personal difficulties including but not limited to: depression, anxiety, posttraumatic stress, grief/loss, substance abuse/dependence, addictions (alcohol, drug, gambling, internet, etc.), career changes, codependency, relationship issues, pain disability prevention, pain/stress management, etc.

Mission Statement

Our mission is to assist and inspire individuals to reach their full potential no matter where they live in Nova Scotia. Together we will achieve results.

Posttraumatic Stress Disorder / Depression / Anxiety Disorders

MRTC offers psychological services for the assessment and treatment of Acute and Posttraumatic Stress Disorder, Depression & Anxiety Disorders. The purpose and goal is to effect psychological change in the individual.

Grief/Loss/Bereavement

Grief & loss, whether it involves the ending of a relationship, separation, life threatening illness, or death of a loved one can have a significant impact on one's ability to cope with many aspects of daily living. MRTC offers therapy to individuals requiring assistance with the grief process & working through the experience of loss.

Addictions (Alcohol, Drug, Gambling, Internet, etc.) Substance Abuse/Dependence

MRTC offers a full range of out-patient assessment and treatment services for the treatment of substance abuse and addictions including: alcohol, drug, gambling, internet, etc. The primary emphasis of treatment is on the individual. Its purpose and goal is to effect psychological change in the individual.

Abstinence and 12-step programs are strongly advocated. The MRTC After-Care Program is designed to promote personal growth and to prevent relapse, keeping recovery alive and active.

Health/Wellness & Adjustment Issues

Dealing with a health problem or making lifestyle changes can often be difficult. MRTC offers therapy to assist individuals in accepting and adapting to their health problems and/or major life changes. In addition, MRTC assists clients in adopting healthier lifestyle behaviour.

Relationship Issues/Couple Therapy

As family/marriage structures change due to breakdown in communication, stresses can impede family/relationship functioning. MRTC offers psychological counselling for families and/or couples experiencing adjustment difficulties.

Career Changes/Burn Out/Vocational Planning

Career changes due to trauma, injuries or stress can create difficulties psychologically, physically and financially. Individuals will benefit from learning how to deal with change and begin to explore employment alternatives through vocational assessment and planning.

Pain/Stress & Disability Management

Before dealing with stress, it is important to learn to understand it. By identifying potential sources of pain/stress effects and developing techniques to reduce its impact, individuals are free to meet their potential. Through counselling, individuals with soft-tissue injuries, are provided with techniques to restore activity to optimal level by behavioral intervention strategies, as well as addressing the psychological factors involved in the rehabilitation process.
